- Certificate of Admission for D-2 VISA Application

1. Notes on Submission

- A. Certificate of Admission (COA, 표준입학허가서 in Korean) is a compulsory document for D-2 (student) visa application.
- B. As the Ministry of Justice strengthens immigration control for foreign students, required documents for COA (Certificate of Final Level of Education, Certificate of Bank Balance) must be submitted by the submission due date.
- C. If you fail to submit the required documents for COA by the submission due date, the COA will not be issued and the students are responsible for any disadvantages that occur due to this case. (Submission Due Date: To be announced after the application results)
- D. If incomplete submission of documents is discovered, both COA and issued D-2 visa will become invalidated.
- E. Please also check the required documents for the D-2 visa application at the website of Korean embassy in advance since all the documents submitted to the university for the COA will not be returned to the student whatsoever after submission.
- F. The maximum D-2 period of stay for a bachelor's degree program is up to 6 years from the date of admission. (including leave of absence period or D-2 period of stay at another university in Korea / up to 7 years for the 5-year program)
- G. Students who will attend Yonsei University with a visa other than D-2 (such as F-4, F-5, H-2, A, etc): since the issuance of COA is unnecessary (the Certificate of Bank Balance is not required), please submit a copy of Korean Alien Registration Card (front and back side, ivisa@yonsei.ac.kr) to prove that you hold the appropriate visa qualifications for studying in Korea.
- H. Details are subject to change according to the rules and regulations of the Ministry of Justice.

2. Documents for the Certificate of Admission (COA)

Successful applicants must complete tuition payment in **January 2027**. Also, for the Certificate of Admission (COA), successful applicants with non-Korean nationalities must submit **the Certificate of Final Level of Education and Certificate of Bank Balance** by the submission due date (to be announced after the application results).

Information

- Tuition Payment and Korean Language Program

1. Tuition Payment Guide

Successful applicants must pay the full amount of tuition during the designated registration period. Please refer to the Yonsei University website to check the tuition fee.

※ During the affiliation with the Global Basic Education Division, students are required to pay the division's tuition fees.

※ Registration Period: To be announced with the admission results

※ How to check the tuition fee:

Yonsei University Website (https://www.yonsei.ac.kr/sites/en_sc/index.do) → ‘Admissions’ in menu → ‘Tuition’ → ‘Undergraduate’

2. Korean Language Programs by Proficiency Level

- A. Korean language education is provided according to the submitted results of the successful applicants’ TOPIK score or the Certificate of Completion from the Korean Language Institute of Yonsei University. In order to successfully navigate the university curriculum applicants are encouraged to improve their Korean language proficiency as much as possible before enrolling at Yonsei University.
- B. Before enrollment, students may complete a Korean language course at Yonsei University’s Korean Language Institute. Upon submission of a certificate of completion, the corresponding level of Korean language proficiency may be officially recognized.
- C. If applicants do not submit a Yonsei University Korean Language Institute(KLI) completion certificate or TOPIK score by the specified date, they will be assigned to GLC Korean Beginner curriculum for the 1st semester of their freshman year. The due date will be announced to matriculated students.

※ Korean Language Test Waivers

- Admitted students can be exempt from GLC Korean Language Proficiency test if they submit a Yonsei KLI Certificate or TOPIK Score.
- The submission period for transcripts or certificates of completion for exemption from the GLC Korean language proficiency test will be separately announced only to matriculated students.

※ Certificates of completion of Korean language courses other than the Yonsei University Korean Language Institute will not be accepted for test exemption.

3. Korean Language Proficiency Requirements for Major Entrance and Graduation

Successful applicants of the International student track and the GLC International student track must acquire the Korean Language Proficiency listed below for major entrance and graduation.

※ The Korean language proficiency requirements below apply to students admitted in the 2027 academic year and are subject to change depending on the year of admission.

- A. Before entering the major: TOPIK level 3 or higher
- B. Before graduation: TOPIK level 4 or higher
- C. Official Korean test score can be replaced with the result of the Korean language test or completion of equivalent or higher Korean language course designated by the Yonsei University Korean Language Institute.

Information

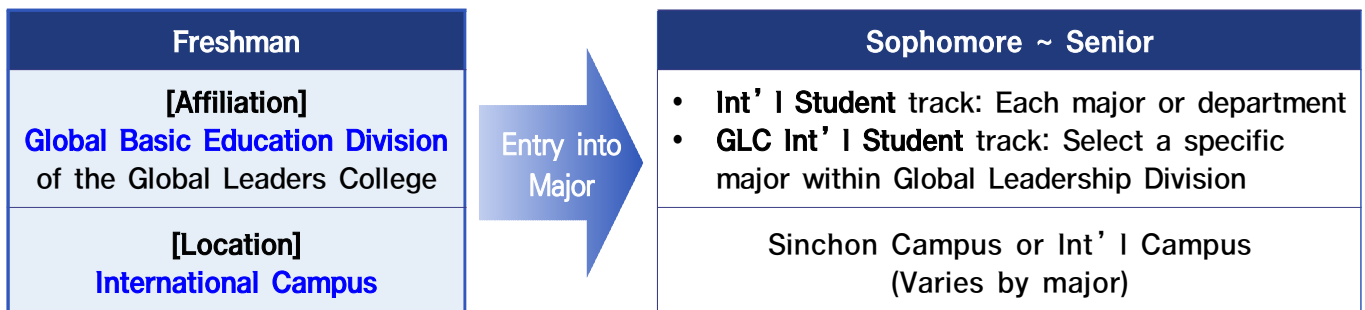

- Global Basic Education Division (GBED)

The following information provides an overview of the Global Basic Education Division for international students entering Yonsei University. Please review the information carefully.

Global Basic Education Division, GBED

International freshmen entering Yonsei University will study at the Global Basic Education Division affiliated with Global Leaders College (GLC) for 1 year. The Global Basic Education Division was established to help the international freshmen adapt to the university life and develop their major academic abilities. At the Global Basic Education Division, freshmen will receive intensive instruction to improve their Korean language proficiency required for their liberal arts and major studies.

1. Affiliation by Academic Year

- ※ Students admitted to College of Medicine, Dentistry, Nursing and Pharmacy are not affiliated with the Global Basic Education Division.
- ※ Students majoring in Physical Education and Sport Industry Studies in the College of Educational Sciences will belong to the Global Basic Education Division for only one semester (not a full year).

2. Programs and Services provided by the Global Basic Education Division

A. Exclusive Education Programs for International Students

- To support non-Korean-speaking students in both their academic success and successful integration into university life, we offer a range of Korean language support programs as well as a specialized education program designed to ease their transition into their chosen major.
- We offer general education courses specifically designed for international students, enabling them to develop essential academic competencies while overcoming language challenges.

B. A Variety of Extracurricular Programs and Personalized Academic Advising Tailored for International Students

- To support the successful academic journey of international students, we have established The Learning Center, which offers comprehensive academic services. The center continuously develops and provides various extracurricular programs, including one-on-one tutoring and face-to-face writing consultations, all aimed at enhancing Korean language proficiency.
- During the first year at the Global Basic Education Division, GLC offers personalized academic advising, including consultations on the curriculum and educational requirements for each department, as well as specialized guidance from academic advisors who support international students. This helps students transition smoothly into their second-year major courses.

C. Extra-Curricular Opportunities

- GLC offers a range of engaging experiences and learning opportunities through special extracurricular programs designed specifically for international students, such as the Korean Cultural Experience program.

D. One-stop Student Service

- We provide comprehensive guidance and services to help international students smoothly adjust to university life in Korea, including assistance with dormitory registration, course enrollment, and other necessary support.

3. Notes

A. Affiliation Period with the Global Basic Education Division

: The first two semesters after admission (before declaring a major), in principle

- ※ During the affiliation with the Global Basic Education Division, students are required to pay the division's tuition fees.

B. Global Basic Education Division students must achieve TOPIK level 3 or higher to declare one's major. TOPIK scores may be replaced with Certificate of Completion of Korean language curriculum or Korean Language Examination score both designated by Yonsei KLI and deemed to be equivalent to that of TOPIK level 3 or higher. (Students majoring in sports are excluded) And it can be replaced with Sejong Korean language Assessment (SKA) score of 321 points or higher. However, specific criteria for Korean Language proficiency may vary among students depending on the year of admission.

C. After entering a major, students will be affiliated with their respective departments, and during the period they belong to the Global Basic Education Division, they are required to pay the tuition fees of the Global Basic Education Division.

※ The content above may change depending on the circumstances.

[Department of Advanced Pharmaceutical Sciences in the College of Pharmacy]

1. Department Overview and Background

- A. The Department of Advanced Pharmaceutical Sciences, established in 2027 within the College of Pharmacy at Yonsei University, is a newly founded science-track department designed to educate future leaders in AI-driven drug discovery and advanced pharmaceutical sciences, which are key areas of the future biohealth industry. The department is established and operated through the convergence of pharmaceutical sciences, life sciences, engineering, and artificial intelligence, with the College of Pharmacy serving as its academic foundation.
- B. In recent years, the pharmaceutical and biotechnology industries have rapidly shifted from traditional experience-based drug development to a predictive and design-oriented paradigm utilizing artificial intelligence (AI), big data, multi-omics, and quantum computing. This transformation has created demand for highly specialized interdisciplinary researchers who can integrate pharmaceutical sciences, life sciences, and data science beyond conventional experimental techniques.
- C. In response to these technological trends, the Department of Advanced Pharmaceutical Sciences was established to cultivate world-class researchers in advanced drug development who possess both domain expertise in pharmaceutical sciences and advanced capabilities in AI- and data-driven analysis and design.

2. Faculty

- A. Full-Time Faculty
 - Experts in basic and applied pharmaceutical sciences, including drug mechanisms, pharmacology, and preclinical research
 - Faculty conducting advanced interdisciplinary research in AI-based drug design, bioinformatics, and computational pharmacy
 - Joint participation of faculty members from the College of Pharmacy and the field of Bio-Convergence Engineering
- B. Interdisciplinary Participating Faculty
 - Faculty members specializing in life sciences, engineering, data science, and artificial intelligence
 - Operation of collaborative teaching and research supervision systems for interdisciplinary education
- C. Adjunct Faculty
 - Industry experts in AI-related fields

- Participation in industry-linked projects and practice-oriented education

3. Educational Objectives

- A. To cultivate advanced pharmaceutical science specialists who will lead AI-based drug discovery
- B. To foster interdisciplinary researchers capable of understanding and integrating pharmaceutical sciences, life sciences, AI, and data science
- C. To train problem-solving professionals who understand the entire drug development process and can apply their knowledge to real-world research and industrial challenges
- D. Educational Features
 - Mandatory AI and programming education throughout all academic years
 - Education in data-driven drug design and analysis
 - Training in multi-omics and bioinformatics applications
 - Laboratory-based practical training and industry-linked projects
 - Capstone design and problem-based learning (PBL)
- E. Curriculum Structure
 - Stage 1: Foundational Competencies (Year 1)
Fundamentals of biology, chemistry, mathematics, and programming
Foundation building in AI and data literacy
 - Stage 2: Interdisciplinary Competencies (Year 2)
AI-based drug design integrating pharmaceutical sciences and AI
Data analysis and bioinformatics
 - Stage 3: Advanced Competencies (Year 3)
AI- and quantum computing-based drug screening
Bioprocess engineering and laboratory practice
 - Stage 4: Practical Competencies (Year 4)
Industry internships
Capstone projects and industry-academia collaborative research

4. Scholarships and Benefits

- A. Scholarship Support
 - Academic Excellence Scholarships
 - Research Participation Scholarships (Undergraduate Research Program)
 - Graduate School-Linked Research Assistant Scholarships
- B. Research Activity Support
 - Industry visits and practical training opportunities within the Songdo Bio Cluster
 - Practice-oriented training programs in collaboration with K-NIBRT and BioLab Hub
 - Opportunities for laboratory internships and undergraduate research participation
 - Support for participation in domestic and international academic conferences and research presentations

C. Educational Benefits

- Undergraduate-to-graduate integrated research track
- Opportunity to complete an advanced AI convergence major and a bioprocess engineering micro-major
- Access to advanced research infrastructure, including quantum computing and bioprocess facilities

5. Career Paths After Graduation

A. Employment Opportunities

- AI-based drug discovery companies and biotech firms
- R&D positions in pharmaceutical and biotechnology companies
- CRO / CDMO / data analytics positions
- Precision medicine and digital healthcare industries

B. Graduate School Advancement (Yonsei University and Domestic/International Institutions)

- Graduate programs in pharmaceutical sciences, biotechnology, and AI convergence fields
- Undergraduate-to-graduate articulation programs

C. Emerging Career Fields

- AI-driven drug discovery and computational pharmacy
- Multi-omics-based precision medicine
- Quantum computing-based drug development
- Bio big data science
